SERIAL NUMBER 4056

GULFSTREAM G450

2006

SERIAL NUMBER 4056

Introducing G450 SN 4056.

If pedigree is important in your evaluation of the G450 market, 2006 Serial Number 4056 rises to the top. The aircraft has had just two U.S. owners, with the current owner having operated the aircraft for more than fifteen years as part of its multi-Gulfstream fleet. During this ownership, SN 4056 has been operated under Part 135 on EJM's certificate and maintained to its exacting industry standards.

Serial Number 4056 is also extremely well equipped, featuring synthetic vision, Avance L5 wifi, upgraded Gulfstream AVDS cabin management system, triple FMS and IRS, and more. Both engines are currently undergoing overhaul and will soon be returned to the aircraft with fresh "zero-time" maintenance status.

The fourteen-passenger cabin is appointed in warm, neutral tones complemented by blue accents. The spacious forward and mid seating areas are separated by a bulkhead from the aft dining and conference area, creating distinct spaces for both productivity and relaxation. The aircraft features an aft galley, along with forward crew and aft passenger lavatories.

Contact us today for additional information or to schedule your review of this outstanding aircraft.
